Description of the organisation

The old "Estudi General de València", founded in 1499 and initially dedicated to the study of Medicine, Humanities, Theology and Laws, has today become a modern European university, open to the culture of practically every branch of teaching. Currently, the University of Valencia stands out as one of the main public research organisations in Spain, with more than three thousand researchers integrated in 90 departments, 19 institutes and other research units belonging to social, biomedical, human, experimental and formal sciences.

Along with human resources, the University of Valencia state-of-art premises and facilities, together with its instrumental equipment, both guarantee the quality of a vast scientific and technological offer available to the service of society. The University of Valencia is a leading academic organisation at national level, with a remarkable international dimension, which ranks among the top 300 in university ranks, such as Shanghai Ranking, THE (Times Higher Education) World University Ranking and URAP (University Ranking by Academic Performance), which measures academic performance of 2500 higher education centres, based on scientific publications. Shanghai 2014 ranks Universitat de València among the top 200-300 universities in the world, and 4th best university in Spain. As per URAP 2014, the University of Valencia ranks third among all Spanish universities, first in Valencia region and 193th in the world.

Experience of the organization in previous European projects

Experience and Expertise of the organization in the project's subject area

The UV teaches the Master of Lifelong Training in Artificial Intelligence, which aims to provide the necessary knowledge to be able to apply the most advanced techniques of Artificial Intelligence, having the ability to train highly qualified professionals with the knowledge/skills necessary to solve complex problems. develop responsibility tasks in companies or initiate both theoretical and practical research activities in artificial intelligence. <https://www.uv.es/uvweb/universidad/es/estudios-postgrado/titulos-propios-postgrado/oferta-titulos-propios/titulo-propio-uv-1286006703791.html?p5=24811230>

It also has a Chair of Artificial Intelligence and Information Visualization <https://iavis.uv.es/>

And Research Group on Intelligent Data Analysis Laboratory – IDAL The main purpose of IDAL is the study and application of intelligent methods of data analysis for pattern recognition, with applications that struggle with prediction, classification or trend determination. <https://www.uv.es/scientific-technological-offer/en/research-groups/research-lines/research-group-intelligent-data-analysis-laboratory-1286225405503/GrupsInves.html?id=1286156602647>

Its members apply classic statistical methods and automatic learning techniques to large databases: statistical hypothesis testing, linear models, feature selection and extraction, neural networks, clustering algorithms, decision trees, support vector machines, probabilistic graphical models, manifold visualization, fuzzy logic, reinforcement learning, etc.

The ultimate goal of the application of these methods is to generate mathematical models which enable the optimization of processes and resources, as well as to reach the optimal decision making stage. A clear example of this is the area of health, where IDAL has developed clinical decision support application based on data analysis. These applications make it possible to improve the patient's quality of life (establishing optimal clinical guidelines) while reducing healthcare costs.

Complementing this knowledge, the group has extensive experience in signal processing (spectral analysis, digital filter, adaptive process, etc.) due to their work of over 10 years in biosignal processing (mainly ECG and EEG). With all this background, IDAL is able to analyse a wide range of data and signals. This fact is backed up by the large number of both private and public contracts it has developed in different areas of knowledge. Furthermore, most of the practical work carried out has been displayed in important scientific publications with high impact parameters and in a large number of communications to international congresses within the area of data analysis.

Among the developed applications, (outside the health area already mentioned) are the following, i.a: web recommendations, models for optimal incentive management to gain customer loyalty, measurement-based shoe recommendations, and other data analysis consultancy works. In addition to its practical work IDAL, it develops new data analysis algorithms improving the performance of the existing ones. This research work is also reflected in a wide dissemination in the form of different publications in journals of impact and in congresses of data analysis relevant to the scientific community.

Contributions that can be provided to the project

The UV will participate in all training, advisory and consulting activities for the construction of capabilities and competencies in Artificial Intelligence applied to higher education

Contact Person's Experience and Expertise

Andrés Payà Rico. PhD in Pedagogy (2006). Professor of Theory and History of Education at the University of Valencia. Lecturer in the Doctorate in Pedagogical Sciences at the University of Bologna. Co-editor of the journal "Espacio, Tiempo y Educación" (Scopus), member of the Editorial Board of the journal "Educatió i Història"; as well as of the Scientific Committee of "Foro de Educación" (Scopus), "História da Educação" (Scopus), "Debates para la Historia" (Mexico) and "Tendencias Pedagógicas" (UAM). Member of the Board of Directors (20017-2025) of the Spanish Society of History of Education (SEDHE). He has been academic secretary (2012-2015) and director of the Department of Comparative Education and History of Education (2015-2019), and since 2019 he has been director of the Master of Psychopedagogy at the University of Valencia. He has carried out research stays at universities in Spain, Belgium, Italy, Peru, Mexico and Ecuador. He has two six-year research periods and one six-year transfer period (CNEAI-ANECA) recognized. Evaluator of the Technical Committee of Education Sciences at the State Research Agency of the Government of Spain and member of the Jury as a member responsible for the area of Social and Legal Sciences of the Young Researchers Competition (INJUVE and Ministry of Youth and Childhood (2019-2024). His lines of research focus on the history of contemporary education and educational policy, as well as teaching innovation and, fundamentally, the study of play as an element of pedagogical renewal. Member of the Research Group of Excellence "Grup d'Estudis Històrics sobre les Transicions i la Democràcia". Principal Investigator (IP) of competitive regional, national and European projects, he currently co-directs the R&D&I project "Education for Global Citizenship and Teacher Training (2024-2028) funded by the Ministry of Science, Innovation and Universities

Santiago Mengual Andrés is currently a Senior Lecturer and the Director of the Comparative Education and History of Education Department of the School of Philosophy and Education, University of Valencia, Spain. He has a Master's degree in Educational Psychology and a Ph.D. from the University of Alicante, Spain. He was a Vicedean of Research, Innovation and Quality of of the School of Philosophy and Education, University of Valencia. He was the Academic Secretary of Valencian Community delegation of AIDIPE

(Interuniversity Association for Educational Research). He was a consultant of the Master in E-Learning (UOC). Since 2003 he has taught several graduate national and international courses. He has also participated as a teacher, coordinator or director in over 30 seminars, workshops and training courses in Educational Technology and Research Methods in Education. His research areas are mainly focused on the role of ICT in Education with more than 95 contributions (articles, book chapters, books, proceedings, etc.). He is currently the Executive Editor of the Journal of New Approaches in Educational Research and reviewer of several scientific journals indexed in JCR and Scopus. In the past 10 years he has served as a Research Fellow in 30 R & D projects financed by public funds and 3 contracts of public-private research, all closely related to Educational Technology and Scientific Publishing

Jacobo Roda Segarra is currently an Assistant Professor and Secretary of the Department of Comparative Education and History of Education at the Faculty of Philosophy and Education Sciences, University of Valencia (Spain). He holds a Bachelor's degree in Teaching, a Bachelor's degree in Pedagogy, a Master's degree in Education and ICT, and a Ph.D. in Education from the University of Valencia. His research focuses on the intersection of ICT and education. His doctoral thesis involved the development of a database for historical-educational research, built upon an Artificial Intelligence model for the automated classification of articles. He has published several articles on the use of Artificial Intelligence in education and on the quantitative analysis of social metrics. He has been a member of two R&D&I projects funded by the Spanish Ministry of Science, Innovation, and Universities, and he leads an educational innovation project funded by the University of Valencia focused on the digitization and preservation of the Museum of the History of Education at the University of Valencia.
